THIS IS MAKEDONIAN ALPHABET KOINE

THIS IS MAKEDONIAN ALPHABET - THE MAKEDONIAN ALPHABET
- KOINON MAKEDONON - KOINE

Makedonian interpretation of the ancient Makedonian word:

"KOINE" - KO I NE - "how and we":

KO - how (the old Makedonian word),

I - and

NE - we (the old Makedonian word).

"КОИНИ" - the Makedonian version "KOINI", english version "koine",
is because on the english the last letter "e", is read "i" - like Italy.

*** "Beritas / 7533", see in detail "MAKEDONIAN ANCIENT CALENDAR"
on page 148 of the book

Following the coins and the letter "DZ" - Dze, we came to a very significant discovery, and that is the Makedonian ruler Vasileos Amyntaoy (not Amyntas, why was it read wrongly) The FIRST, the father of Vasileos Alexandroy (Alexander) The FIRST, already used it the alphabet "KOINON MAKEDONON" before his son and successor of his coins, so the theory that the alphabet originates from the time of the Makedonian ruler Koinon (not Koinos), is more closer.

The Makedonian ruler Vasileos Amyntaoy The FIRST signed his coins with the name of the god of light DZE, the letter: "◎" - DZ or DZE.

THE MAKEDONIAN ALPHABET "KOINON MAKEDONON"
THE MAKEDONIANS USE IT FOR 100 YEARS BEFORE THE
ADZEIANS (DANAI'S) proven on coins of the time of the Makedonian
ruler Vasileos Amyntaoy The FIRST, the father of the Makedonian
Vasileos Alexandroy The FIRST.

The Greeks today, who have no cultural, religious, anthropological or linguistic connection with "the Danai's", they claim that they invented it that alphabet, but we have evidence that they are lying.

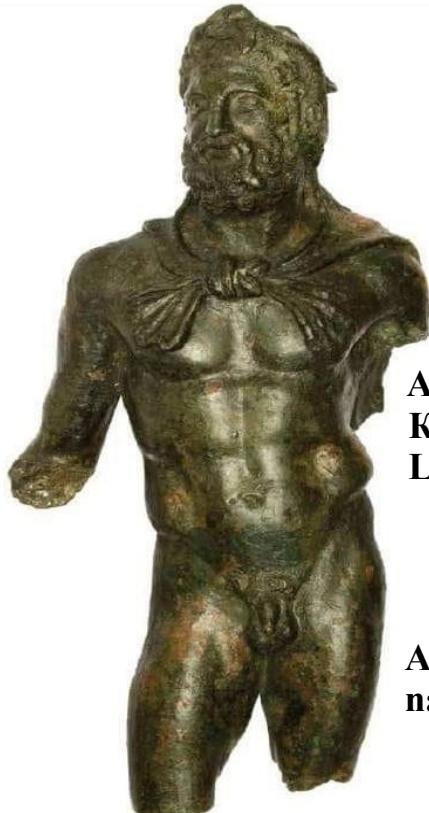

*** See map "Danaic origin and migrations" page 169 and 170, for modern Greek nation, which has no relation to the ancient nations, in short, page 177

AND THE SCYTHIANS ALSO USED THE ALPHABET KOINON MAKEDONON

"**ΚΟΣΩΝ**" - KOSON (askance he) 100 BC, Scythian (so - called Getic - Dacian) coin which proves that the Makedonian alphabet KOINON MAKEDONON was also used in the northeast across the river Istar (Danube), an exclusive minted proof.

Interpretation of the name ARAKLE - APA K LE:

APA - the goddess Ara daughter of Ar, wife of Dze,
K - how,
LE - L (LE is syllabic), the god of the Sun.

Arakle - (a modernized religious version of the name Makedon), Arakle, the child of Ara and Le.

"ΗΡΑΚΛΕ" - Arakle (not Hercules, a name that is misread), artifact from Lyenidion (Ohrid) - "The Lake of The Three Suns", statue 3rd - 1st century BC. (** Why Lyenidion see page 98a).

CODED ALPHABET KOINON MAKEDONON

The holy letter "H" is interpreted as "A", in smaller cases as "E", but if it is a coded letter, then it is any letter, in order to read the text you need to know it the Makedonian language, usually the "code" is also in the duplicated letters.

The holy ruler Vasilitsas Kleopatras gives us a precise answer as to who she is, on the third (the board is in Louvre - France), row:

1 line - Y'BER VASILITSAS - THE MOST HOLY - BRIGHTEST QUEEN,

2 line - KLEOPATRAS DZE - KLEOPATRAS THE ILLUMINATED (DZE)

"ΦΕ", the letter: " ⊙ " - DZ is damaged,

3 line - AS F ILO PA TOR' TO (SHE),

- I AM THE STRONGEST,
- THE BRIGHTEST,
- THE BIGGEST,
- THE MOST HOLY (SHE).

(*** The rest try to decode the rest yourself)

**TOCHNO NA I TIA,
KAZHI NO DOI,
ON SI NA GO GOS,
75NO FRIS LESONAS.**

MAKEDONIA

FROM HERE IT COMES:

MAKEDONIA - MAKEDONIA

MAKE - MOTHER, the Goddess Great Mother - MA,

DON - GOD - D ON - the Creator (the god D is the second creator of the universe, the first is ARON),

I - and,

A - I.

Makedonia.

*** See also ancient Makedonian calendar, page 148

**SPECTACULAR, THE FIRST MAKEDONIANS,
the Goddess MA, the Creator God DON and their son MAKEDON
From right to left - MAKE DON I A,
(artifact) from the tomb of the Makedonian ruler Vasileos Makedonon Philippou**

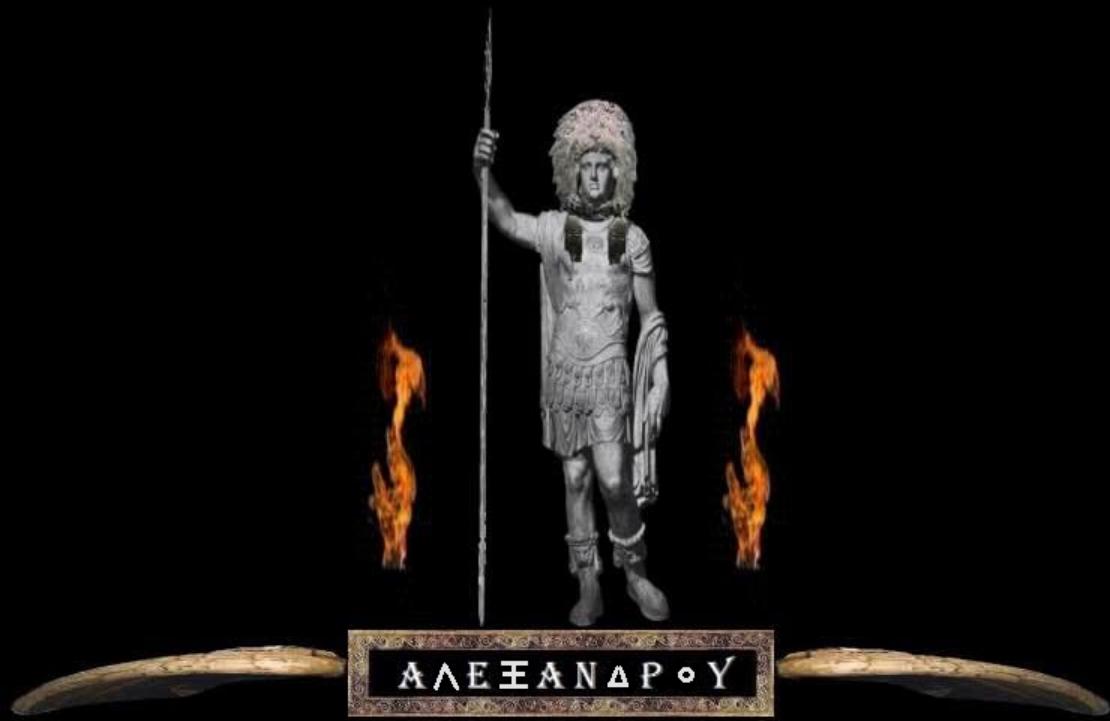

The Makedonians - childrens of the Goddess MA, means: Makedon and I - and I am a child of Goddess MA - Makedonia.

MakedonOn

*** The name of the Creator DON, "D" (name of god), "ON" (he), is taken from the Makedonian ancients deities. ILE as well as DZE, are the childrens of the Creator DON.

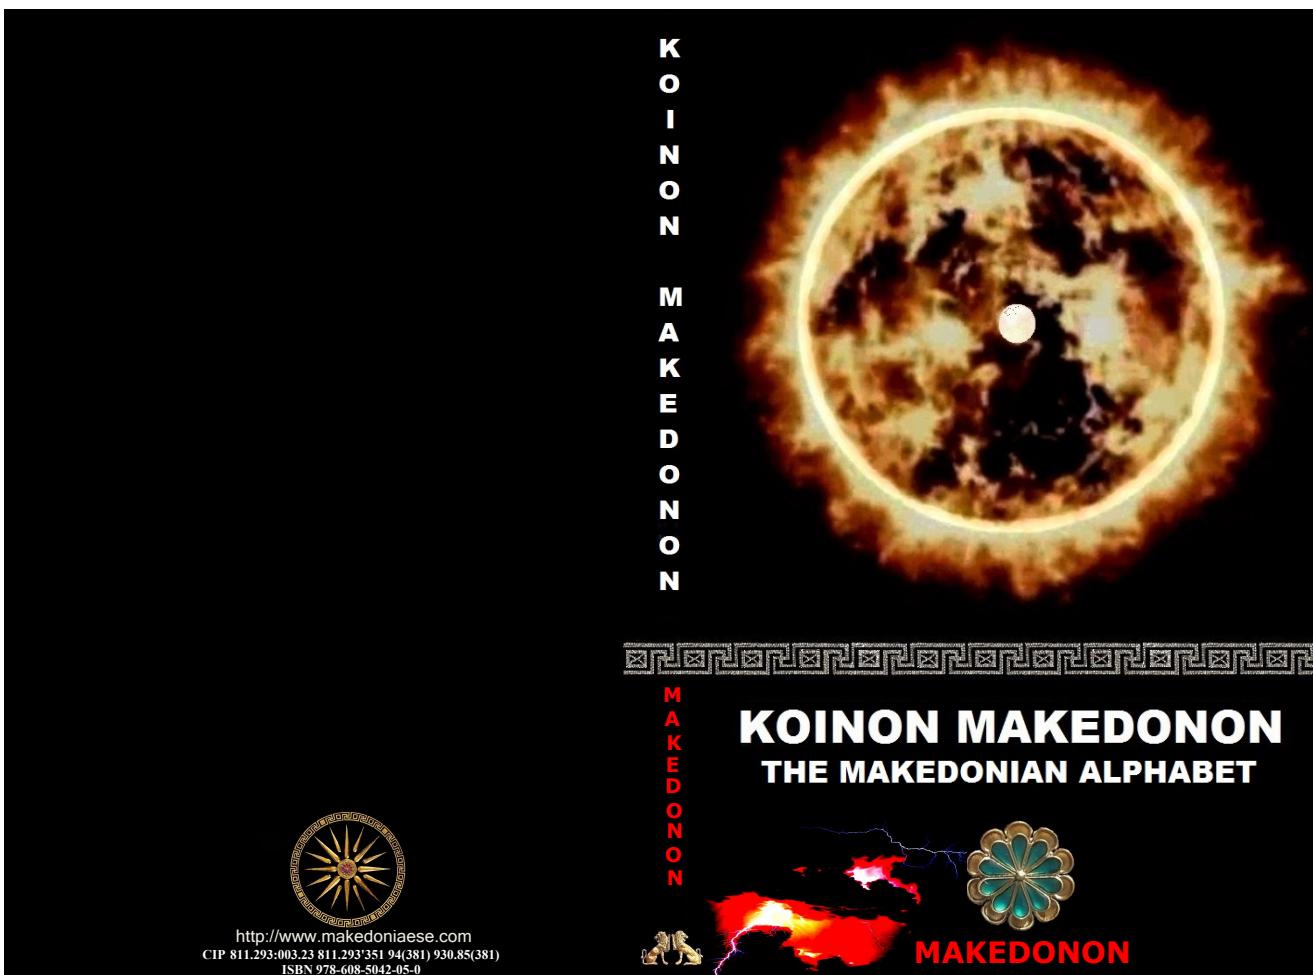

ΒΑΣΙΛΕΩΝ Θ ΜΑΚΕΔΟΝΩΝ

The period from the death of the Makedonian ruler Vasileon Makedonon Alexandroy, according to the Makedonian calendar, 17 Panon (2 June) 323 BC until the death of the Vasilitsas Kleopatras, Loy (12 August) 30 BC is called THE MAKEDONIAN PERIOD, why all the main protagonists from that time period are Makedonians, and not "the Hellenistic period".

The Hellenism is a much later Latin term, invented by the so-called historians to erase it the Makedonian name and to distort it the history.

THE COVER OF THE BOOK "KOINON MAKEDONON - THE MAKEDONIAN ALPHABET"

Interpretation of the book cover

The main role takes the letter "⊖" - DZ the symbol of Dze - The Sun. A series of lines of the Makedonian mosaic of "magic squares" with galaxies, astronomical Makedonian religious symbols, magic windows - mathematical constants, mystical windows to get to know the past, for a better present and future, protectors of the Earth (The Makedonian Rose - light blue rose).

A series of lines of galaxies they symbolize the galaxy, man, eternity, fertility, this is an ancient Makedonian symbol taken over by other cultures.

A magic window (right window) gets its name because, what all rows, columns and diagonals add up to the same sum, which is called the magic constant. "The magic window", is on the first mint of the Makedonian ruler Vasileos Amyntaoy the FIRST, but it is far older than it and is found on many other Makedonian artifacts. Makedonians were astronomers (Kokino - The megalithic observatory), mathematicians (the window), doctors (Appokratas from Kos - "ΗΓΓΩΝ ΚΡΑΤΑΣ" so called Hippocrates), philosophers (Aristotil), biologists and etc. even in antiquity. The ancient mystical Alexanroy (Alexander) Academy of Alexandria had that emblem as a symbol, called "The magic window".
